HDPE Welding Rod

PRODUCT DESCRIPTION

Musa Poly Pack HDPE welding rod for extrusion welding or hot air gun welding. Polyethylene welding wire is often used for repairing gouges in HDPE pipe or sheet, or welding outlets on HDPE pipes and poly tanks. Polyethylene welding rod comes in different thicknesses and lengths, and is also known as plastic welding wire or plastic welding rods. Round poly welding wire comes in 3 mm & 4 mm width, in 3 kg or 10 kg rolls. 4 mm circular poly welding rod is available in hot gas welding yellow, for use with yellow plastic or gas lines. 5.7 mm triangle poly welding wire is available in 220 m coils, because the triangular shape suits some PE extrusion welding guns. Triangle PE welding rod is commonly used for tack welding with a hot air gun, before fully welding with an extrusion gun.

Sr.	Product	Cross-Section/Shape	Color	Packing Size	
1.	HDPE Rod	 Single Round Dia: 3.0mm \pm 0.2mm	Black	5kg/Roll	
2.	HDPE Rod	 Single Round Dia:4.0mm \pm 0.2mm	Black	5kg/Roll	
3.	HDPE Rod	 Single Round Dia:5.0mm \pm 0.2mm	Black	5kg/Roll	
4.	HDPE Rod	 Single Round Dia:8.0mm \pm 0.2mm	Black	5kg/Roll	

PRODUCT FEATURE

Acid resistant, alkali resistant, salt resistant, anti-corrosion nontoxic and anti-aging, on the other hand, the welding rod we produce uses the same formula of raw materials with our geomembrane for production to ensure the good welding quality.

APPLICATIONS

Plastic welding rod is mainly used with plastic extrusion welding machine to weld the HDPE/LLDPE geomembrane or other polyethylene sheets/plates, containers, pipelines and tanks etc.

PRODUCTION & QUALITY CONTROL

As a professional geomembrane and its accessories manufacturer, we fully understand that product quality is most important to our sustainable development. We have the strict quality control and a strong team, thus Musa Poly Pack has set up a full set of scientific & standard production system strictly complying with ISO9001:2015; We own the advanced & modern production equipments including the Vertical blow molding geomembrane production line, Extrusion geomembrane production line, Composite geomembrane production line etc; and the advanced & modern testing instruments & apparatus, meanwhile we have more than 10 years working experience in the geosynthetics field, all of those can ensure the high quality of our products.
